## INTRODUCTION

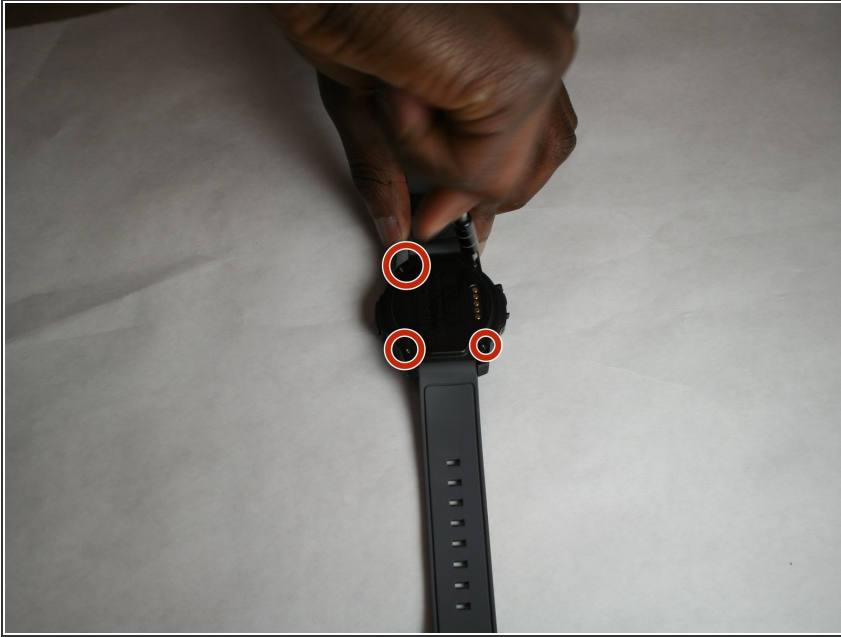

Batteries tend to lose capacity over time. This guide will show you how to replace the battery of your Nixon Mission Android Wear.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Battery

- Remove 4 4.5mm Phillips head screws from back side of watch using PH00 Phillips head.

## Step 2

- Remove the back plate of watch.

### Step 3

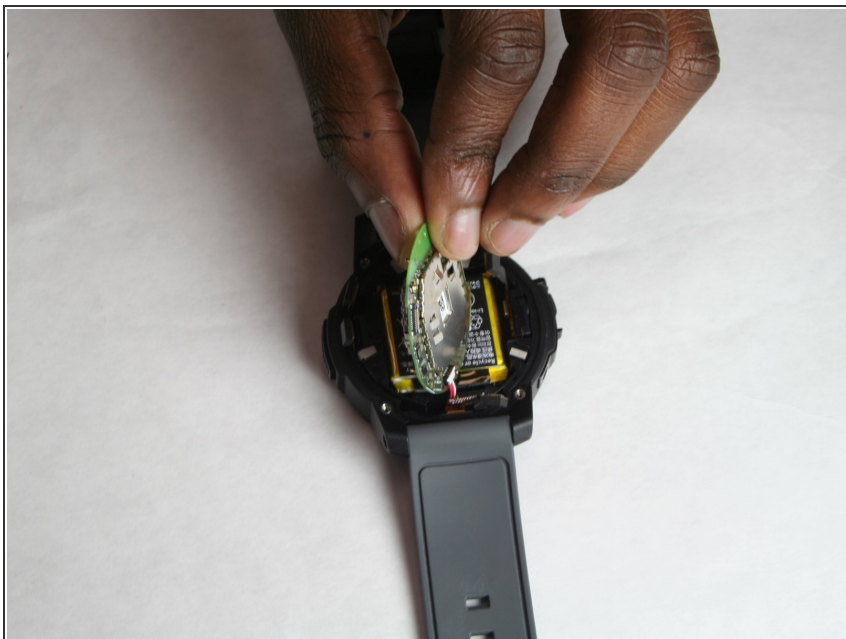

- Unclip 5 latches from motherboard using a plastic spudger.

### Step 4

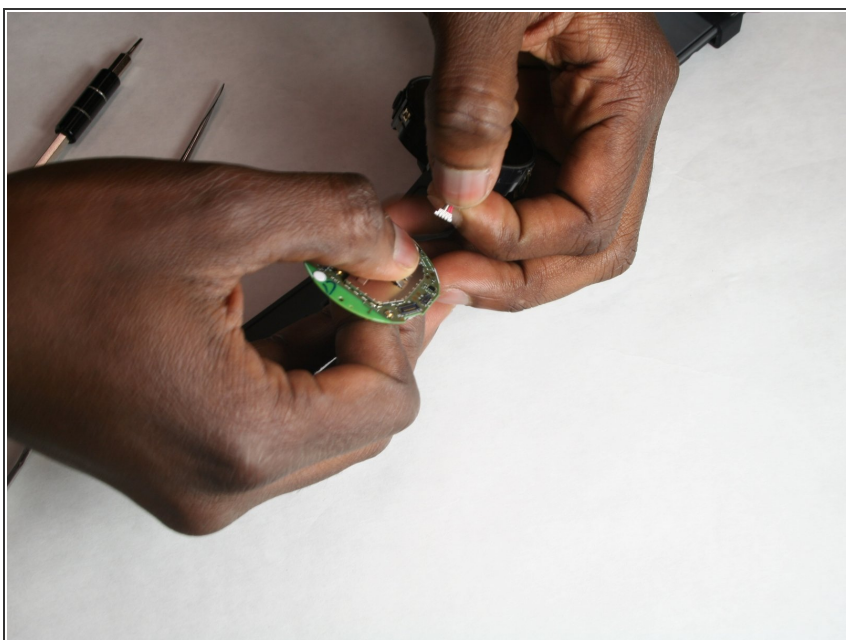

- Remove the 2 3.0mm screws from motherboard using PH00 Phillips head.

## Step 5

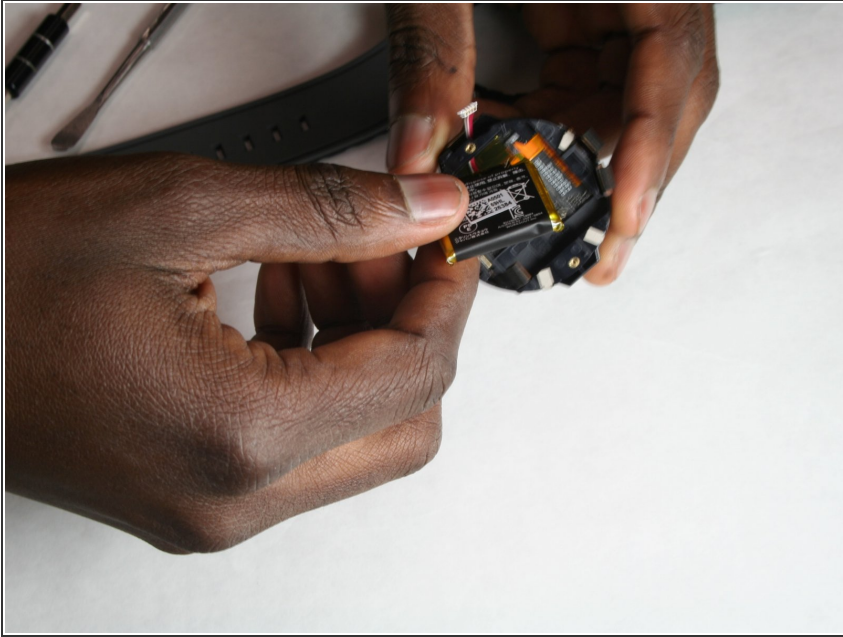

- Carefully remove motherboard & internal screen.

## Step 6

- Remove from the motherboard the connector with the four cables.
- Pull the cables upward and the motherboard downward as shown in the picture.

## Step 7

- Carefully remove the battery from the watch.

To reassemble your device, follow these instructions in reverse order.
