[Dell Inspiron Keyboard - K8X85](#) (1)

## Step 1 — Keyboard

- Using the flat end of the spudger press in the 5 tabs, located on top of the keyboard, as you use the spudger to pry each section up.
- After releasing the 5 tabs, slide the opening tool around the top and sides of the keyboard to make sure it is fully released.

## Step 2

- Now lift the keyboard enough to access the ribbon cables beneath it.

## Step 3

- For the two ribbon cables connecting the keyboard to the laptop, use your finger to lift the latch up.
- Once the latch is raised, lift the ribbon cable up and out of the latch.

## Step 4

- Now that the keyboard has been fully disconnected from the laptop, lift it off of the device.

To reassemble your device, follow these instructions in reverse order.
