Wahl Chrome Pro Power Switch Replacement
This guide discusses replacement of a faulty power switch for the Wahl Chrome Pro.

Written By: Holly Dunn

INTRODUCTION

The power switch connects the device motor to the power cord. If the power switch becomes broken or worn, the device may not function properly.

🔧 TOOLS:

- Phillips #2 Screwdriver (1)
- Spudger (1)
- Tweezers (1)
- Phillips #1 Screwdriver (1)

Step 1 — Case

- Remove the two 5.0 mm JIS #1 screws to loosen the cutting blades.

⚠ Make sure your device is not connected to power before you begin.

Step 2

- Lift the bottom blade straight up from the device body to remove it.

Step 3

- Remove the three 9.0 mm JIS #1 screws attaching the base of the blade assembly to the body.
Step 4

- Lift the base of blade assembly straight up off of the body.
Step 5

- Remove the two 12.0 mm JIS #1 screws on the back of the device body.

Step 6

- Remove the 13.0 mm Phillips #2 screw on the side of the device body.
 - This screw is located on the opposite side of the body from the switch.

Step 7

● Remove the spring on the side of the body using tweezers.
Step 8

● Pry the body case off of the device using a spudger.
Step 9 — Power Switch

- Remove one 7.5 mm JIS #1 screw connecting the power cord to the switch base.

Step 10

- Remove one 7.5 mm JIS #1 screw connecting the wire to the switch base.
