INTRODUCTION

This guide will show Sony Vaio owners how to repair individual keys on their keyboard.

🔧 TOOLS:

- Spudger (1)

Step 1 — Keyboard Key

- Open your computer.
 - Make sure the computer is turned off.

Step 2

- Find the broken key.
  - The S key is our example though it is not broken.

Step 3

- Insert the plastic spudger underneath the edge of the key.

- Lift the key until it pops off on all four corners. There should be a white plastic base underneath the key.

Step 4

- Orient replacement key over the white plastic base, so it is aligned properly with the other keys.

- Press the replacement key firmly in the center until it is completely depressed and attached to the key base.

Step 5

● Test the key by releasing the key. It should pop up and look like the rest of the keys on the keyboard.

Congratulations! You have successfully replaced a key on your keyboard.
