Unclogging the Pipes Replacement

A guide to unclogging a block in your vacuum's pipes.

Written By: Sophia Stockburger

INTRODUCTION

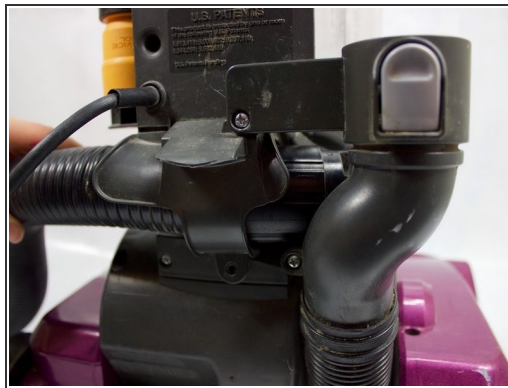

This guide is intended to show you how to unclog the pipes of your vacuum. You may need equipment such as pipe cleaners, brushes, or sticks to remove the blockages. You need to begin this with the vacuum unplugged.

Step 1 — Hoover T-Series WindTunnel Pet UH70102 Unclogging the Pipes Replacement

- Press the silver tab on the bottom of the vacuum.

Step 2

- To remove hose, rotate pipe counterclockwise and pull down.
- Remove hose from vacuum completely by sliding piping through bottom housing.

Step 3

- Remove any clogs from the pipe using a long dull object.
- Make sure to check the pipe connectors for clogs too!

To reassemble your device, follow these instructions in reverse order.
