Step 1 — Battery

- Slide the gray switch from lock to open position.
Step 2

- Pull down on the blue tab to release the battery.
Step 3 — Outer Case

- Use a PH00 screwdriver to remove the five 3.5 mm screws.
- Use a PH00 screwdriver to remove the two 2.5 mm screws.

Step 4

- Pry apart the case gently using a plastic opening tool.
Step 5 — Flash Assembly

- Pry back the panel to the right of the screen using a plastic opening tool.
Step 6

- Working on the left side of the screen, pry the metal panel off from the motherboard housing using a plastic opening tool.

Step 7

- Pull out the ZIF cable from the motherboard.

- ⓘ When removing the ZF cable, pull it straight out to avoid damaging the cable.
Step 8

- Pull the capacitor out of the shell.

- ⚠ Be careful not to shock yourself on the capacitor(metal components on the top)

Step 9

- Unpin the flash assembly.

Step 10

- Lift flash component toward you and gently pull the ZIF cable up and away from the camera.

To reassemble your device, follow these instructions in reverse order.
