Razer Blackwidow Tournament Edition Chroma Back Panel Replacement
Written By: Advika Chesetti
![wrench icon] **TOOLS:**
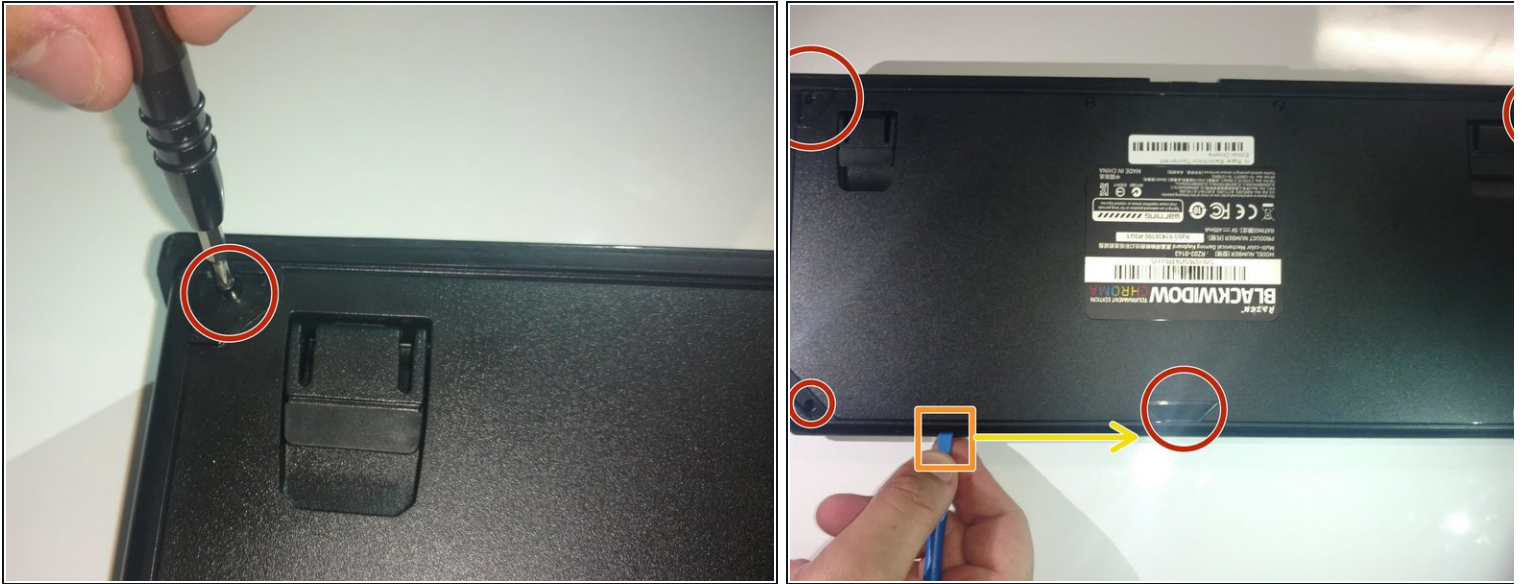

Phillips #1 Screwdriver (1)
iFixit Opening Tool (1)

Step 1 — Rubber Feet

- Turn the keyboard over so that it is lying flat on its face.
- Use the iFixit opening tool to pry the rubber feet off the keyboard.

Step 2 — Front Panel

- ● Use a Phillips #1 screwdriver to remove the six screws on the back of the keyboard.

- ● Use an opening tool as a wedge between the front and back panel to pry open the front panel.
  ⚠ If the front and back panel won't separate, **DO NOT** use excessive force. This may result in damaging the keyboard.

  - ● Instead, slide the opening tool across the keyboard in between the front and back panel. Go around the edges of the keyboard until the panels disconnect.

- ● Flip the keyboard over so the keys are facing up.

- ● Grabbing the left and right lips of the front panel, lift both ends up, removing the front panel.

Step 3 — Back Panel

- Use a Philips #1 Screwdriver to remove the four screws located below the keys.

- Lift the main circuit board and flip it over, placing it on its top.

  ⚠ Be cautious of the wire connected to the USB Port Board.

To reassemble your device, follow these instructions in reverse order.
