INTRODUCTION

This guide provides thorough instruction on the proper replacement technique for the Lenovo ThinkPad Edge E520's Hard Drive.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Battery

⚠ Power off and unplug the computer before the start of these steps.

- Close the laptop lid.

Step 2

- Flip the computer so that the back is facing upwards.
- Locate the switch used to release the battery.
- i** The switch should be located towards the hinge of the laptop near the battery pack and have a lock icon associated with it.

Step 3

- Slide the switch towards the unlocked lock icon.
- While holding it in the unlocked position, slide the battery towards the hinge.
- Fully separate the battery pack from the back of the laptop.

Step 4 — Back Plate

- Flip over the laptop and position it with the battery being furthest away from you.
 - Remove the four screws on the edges of the T-Shaped plate with a Phillips #0 screwdriver.
 - Remove the T-Shaped plate from the back of the computer. It should come off easily if all four aforementioned screws are removed.
- ⓘ Screw length 6.35 mm, head 3.175 mm

Step 5 — Hard Drive

- Position the laptop so that the battery compartment is facing away from you.
- Remove the two bracket screws on the bottom of the hard drive.
- Gently lift out the hard drive with its bracket still attached.
- Remove the bracket from the hard drive.

To reassemble your device, follow these instructions in reverse order.
