

Makita GA4030K CARBON BRUSH Replacement

EDGE PROJECT

Written By: leo

TOOLS:

- [Essential Electronics Toolkit \(1\)](#)
-

Step 1 — CARBON BRUSH

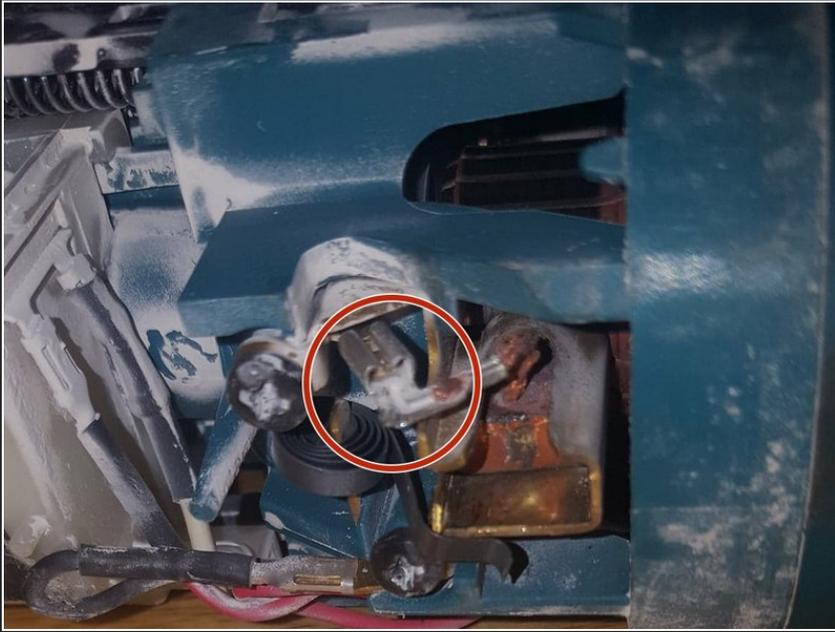

- First, remove the single black screw from the end of the handle

Step 2

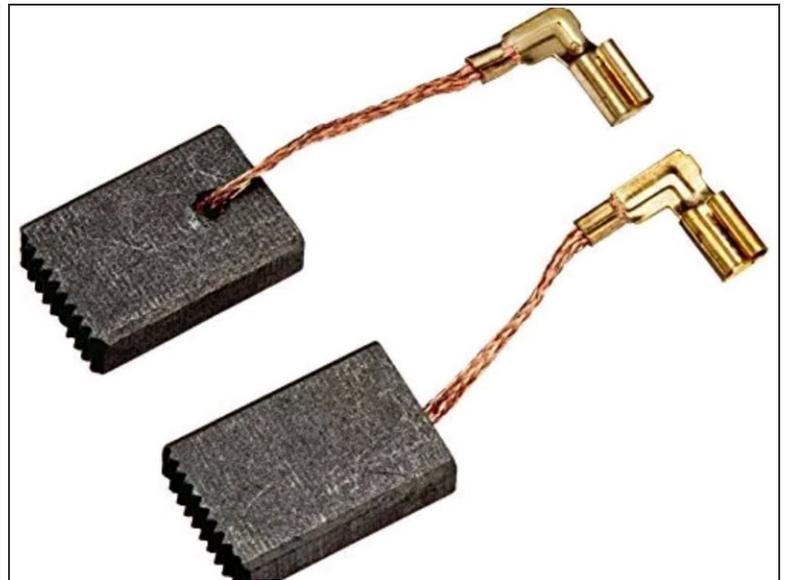

- Separate the handle by pulling the two ends apart.
- Remove the two screws.

Step 3

- Remove the carbon, and unclip the wires connected to it.

Step 4

- Old vs. new carbon.

To reassemble your device, follow these instructions in reverse order.
