INTRODUCTION

For this guide, you'll need to use a metal spudger to remove the individual keys from the keyboard. You can also use a plastic opening tool to remove the keys as well.
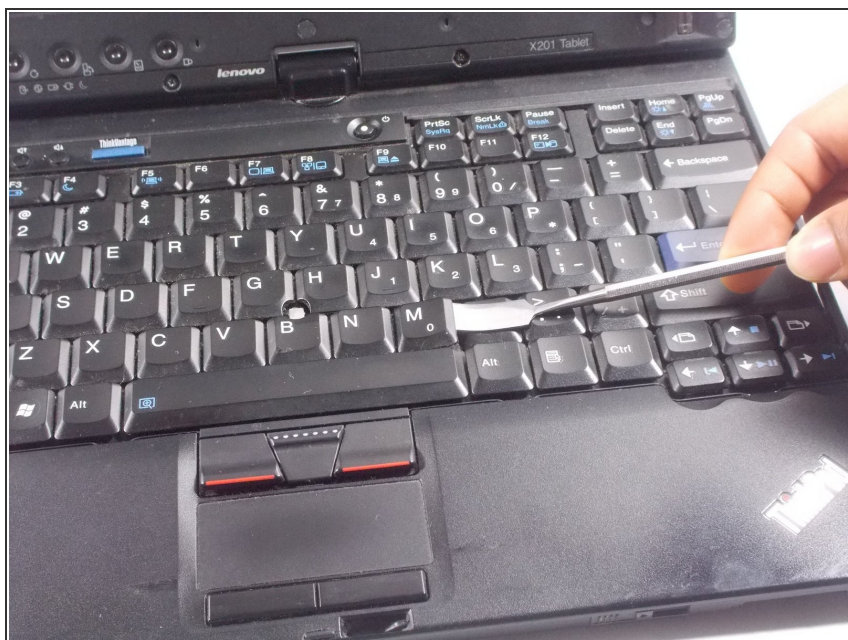

🔧 TOOLS:

- Spudger (1)
- Metal Spudger (1)

Step 1 — Keyboard Key

● Turn off laptop by pressing the power button.

Step 2

● Use a metal spudger or a flat head screwdriver to pry up the desired key.

Step 3

- Again with the pry method, pry up the below component below the key.

Step 4

- Grab and pickup the square shaped component. This is the part that you can clean out.

To reassemble your device, follow these instructions in reverse order.
