INTRODUCTION

This guide will show you how to replace your Toshiba's DVD tray when it is no longer working correctly.

TOOLS:

- [JIS #1](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Hard Drive

- Remove the 7mm Phillips screw located on the back panel of the device using the J1S Phillips head screwdriver.

Step 2

- Pry the back panel out of the laptop using the spudger tool

Step 3

- Locate and unscrew the five 3.5mm screws holding the hard drive in place using the J1S Phillips head screwdriver

Step 4

- Slide the HDD towards the sticker on the left.

Step 5

- Remove the four 2mm Phillips screws from the HDD tray securing the disk using the J1S Phillips head screwdriver.
- Remove the hard drive from the tray.

Step 6 — DVD Tray

- Remove the ten 7mm screws located on the bottom of the laptop using the J1S screwdriver.

Step 7

- Insert a plastic opening tool and follow the edges to open the panel.

Step 8

- Once open, locate the CD tray indicated in this picture.

Step 9

- Lift the tray up and out.

To reassemble your device, follow these instructions in reverse order.
