Step 1 — Back Panel

- Remove the ten 7.9 mm screws with the Phillips PH0 screwdriver.

Step 2

- Insert metal spudger into a gap in between the back panel and the back of the screen.
- Pry off the back panel using the metal spudger as a lever, and remove the back panel by lifting the rest off by hand.

Step 3 — SSD M.2 Drive

- Remove the single 3.6 mm screw holding the left side of the M.2 SSD card with a Phillips PH0 screwdriver.

Step 4

- Gently pull out the SSD card at the angle it is relaxed in to remove it. It is easiest to do this by hand.
- ⚠ Be gentle when pulling the SSD card out. It should take little effort to get it to slide out properly.

To reassemble your device, follow these instructions in reverse order.
