Step 3 — Popping up the Memory Module

- Use your fingertips to carefully spread apart the securing clips on each end of the memory module connector until the module pops up.

- NOTICE: To prevent damage to the memory module connector, do not use tools to spread the securing clips that secure the memory module.
- NOTICE: Handle memory modules by their edges, and do not touch the components on a module.
Step 4 — Popping up the Memory Module

- Remove the module from the connector at a 45-degree angle.

Step 5 — Align the Notch

- Align the notch in the module edge connector with the tab in the connector slot.
Step 6 — Sliding the Module

- Slide the **NEW** module firmly into the slot at a 45-degree angle, and lower the module until it clicks into place. If

you do not feel the click, remove the module and reinstall it.

Step 7 — Replace the Modem Cover

- Replace the memory module/modem cover and tighten the captive screws.

ⓘ NOTICE: If the memory module/modem cover is difficult to close, remove the module and reinstall it. Forcing the cover to close may damage your computer.
