

# Hover-1 Horizon Wheel/Motor Replacement

How to replace the wheel and motor of the Hover-1 Horizon.

Written By: Casey Winans

## INTRODUCTION

Is one side of the hoverboard not functioning, or unresponsive? This is a guide to show you how to replace the wheel, or motor (which is apart of the wheel) on the Hover-1 Horizon. This guide requires a Phillips #2 and a Phillips #1 screwdriver, and a 6mm hex key.

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [Phillips #2 Screwdriver](#) (1)
  - [6 mm Hex Key](#) (1)
-

## Step 1 — Base Plate

- Remove the six 12mm Phillips #2 screws holding the base plate.

## Step 2

- Remove the two 11mm Phillips #1 screws that hold the base plate to the body.

## Step 3

- Remove the base plate by lifting it up.
- ⓘ The base plate is connected to the body with wires. The wires are long enough to set the base plate to the side.

## Step 4 — Left Gyroscope Sensor Board

- Remove the two connectors on either side of the board by lifting the tab and pulling out.
- Remove the connector in the middle of the board by squeezing the tab and pulling up.

## Step 5

- Remove the four 11mm Phillips #1 screws that hold the cover on.

## Step 6

- Remove the four 11mm Phillips #1 screws that attach the gyroscope board to the mount.
- Lift the board to reveal the connections on the bottom.

## Step 7

- Remove the middle connector by squeezing the top of the tab and pulling up.

## Step 8

- Remove the four 12mm Phillips #2 screws that hold the motherboard to the base.
- Pull the motherboard away from the gyroscope by grabbing it with two hands and pulling it to the right .

## Step 9

- Unclip the black connector by squeezing both sides and pulling them apart.

## Step 10 — Wheel/Motor

- Remove the four 30mm Hex #6 screws.
- Lift away the silver bracket and set it to the side.

## Step 11

- Disconnect the first clip by squeezing the latch that hold the clips together while pulling apart.
- Disconnect the second clip by squeezing the tab while pulling the clip apart.

## Step 12

- Detach the remaining three connections by pulling them apart.

## Step 13

- Remove the wheel by lifting it away from the base with both hands.

To reassemble your device, follow these instructions in reverse order.
