

Ring Spotlight Cam Battery Motion Detector Replacement

A step-by-step guide for motion detector...

Written By: Marisol Esparza

INTRODUCTION

A step-by-step guide for motion detector replacement on a Ring Spotlight Battery-Powered Cam .

TOOLS:

- [Ruler](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Motion Detector

- Turn Ring Spotlight Cam to the posterior side and flip upside down

Step 2

- Press down on top button and open upward

Step 3

⚠ Make sure to remove the batteries in the Spotlight cam before proceeding with this step!

- Open the Spotlight Cam upward and remove the two screws with a Phillips #1 screwdriver.

Step 4

- Remove the two screws down the middle and lift the middle component off

Step 5

- Remove the remaining 10 screws that are around the border under the tape.

Step 6

- Gently close the top of the lid

Step 7

- Remove the top lid and replace the LED light

To reassemble your device, follow these instructions in reverse order.
