---

## INTRODUCTION

Use this guide to replace the fan in the Lenovo Essential G555-0873. This will also allow you to access the heat sink, and replacing the fan will help if your computer is overheating.

---

### **TOOLS:**

- [Phillips #0 Screwdriver](#) (1)
-

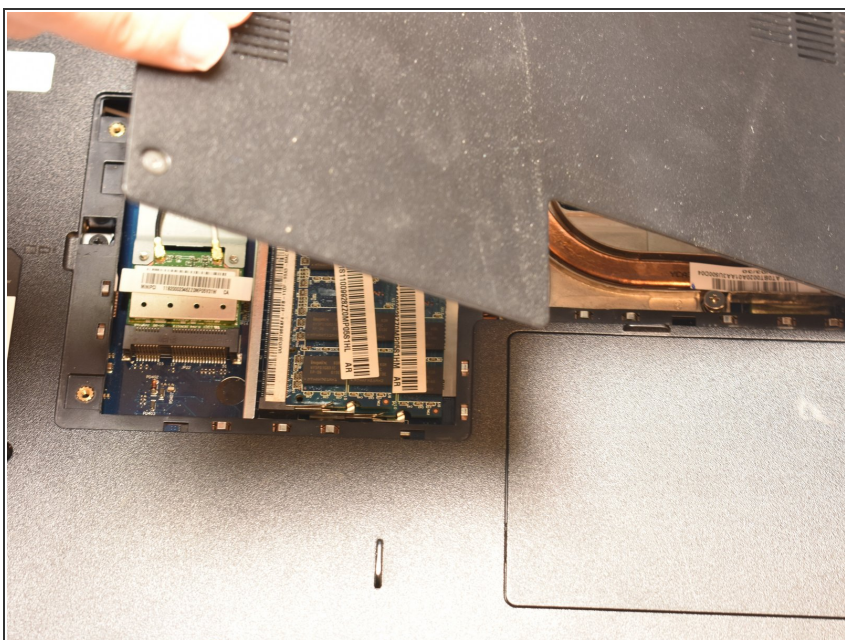

## Step 1 — Bottom Panel

- Unscrew the two 5.1 mm screws that secure the bottom cover.
- ⓘ Note that the screws will not come all the way out of the sockets.

## Step 2

- Lift from the notch until the back panel comes up.

## Step 3 — Fan

- Disconnect the fan from the motherboard by pulling the plug shown in the picture.

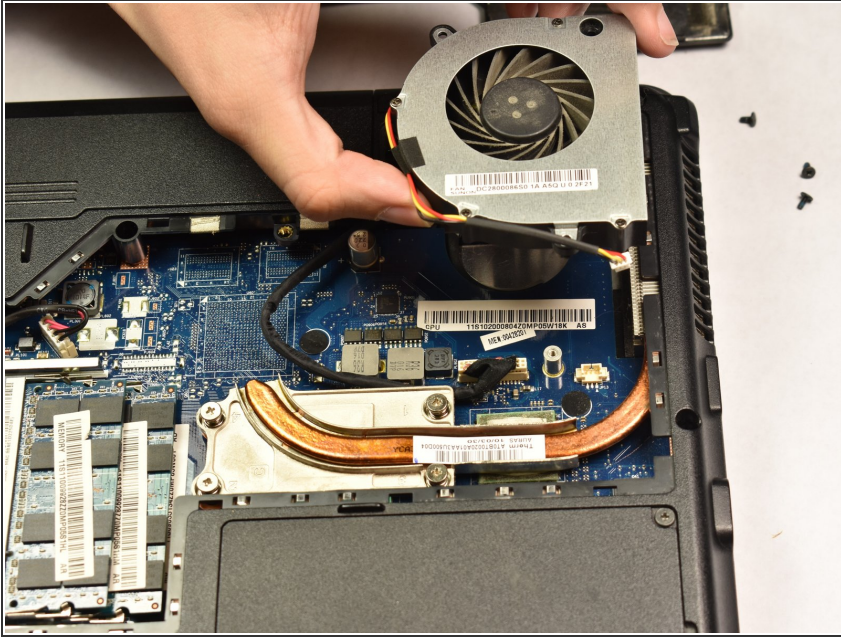

## Step 4

- Unscrew the three 4.6mm screws shown in the picture.

## Step 5

- Gently lift the fan straight up until it is lifted out of the case.

To reassemble your device, follow these instructions in reverse order.
