

LG V30 Plus Rear Glass Replacement

This guide will teach you how to remove the rear glass on the back of the LG V30 Plus.

Written By: Geoffrey Smith

INTRODUCTION

To reach the inner workings of your device, you'll need to remove the rear glass. In addition, if the rear glass of your phone is cracked, use this guide to remove the rear glass.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [iFixit Opening Picks set of 6](#) (1)
 - [iOpener](#) (1)
-

Step 1 — Rear Glass

- Use a pair of iOpeners by heating them in a microwave and placing the hot pads on the edges of the phone.
- Allow to sit for 1-2 minutes to heat up the adhesive.
- ❗ A heat gun may need to be used if you have trouble separating the backing in the next step.

Step 2

- Insert an Opening Tool into the seam between the rear glass and side of the phone.
- Pry the glass off just enough to insert an Opening Pick.
- Slide the Opening Tool around the edges of the device, placing Opening Picks regularly.

Step 3

- Once all edges of the device are lifted free, use a Suction Handle to gently pull the rear glass off the device.

To reassemble your device, follow these instructions in reverse order.
