

2002-2007 Jeep Liberty Rear Indicator Light Replacement

This guide will show you how to replace the rear indicator light bulb of a 2002-2007 Jeep Liberty.

Written By: Madison Brown

INTRODUCTION

The rear indicator light of a vehicle communicates the driver's intention to turn or change lanes. However, indicator light bulbs go out after years of use. Driving with a broken indicator light bulb is dangerous and often illegal. This guide will help you replace the rear indicator light bulb of a 2002-2007 Jeep Liberty.

TOOLS:

- [T20 Torx Screwdriver Bit](#) (1)

PARTS:

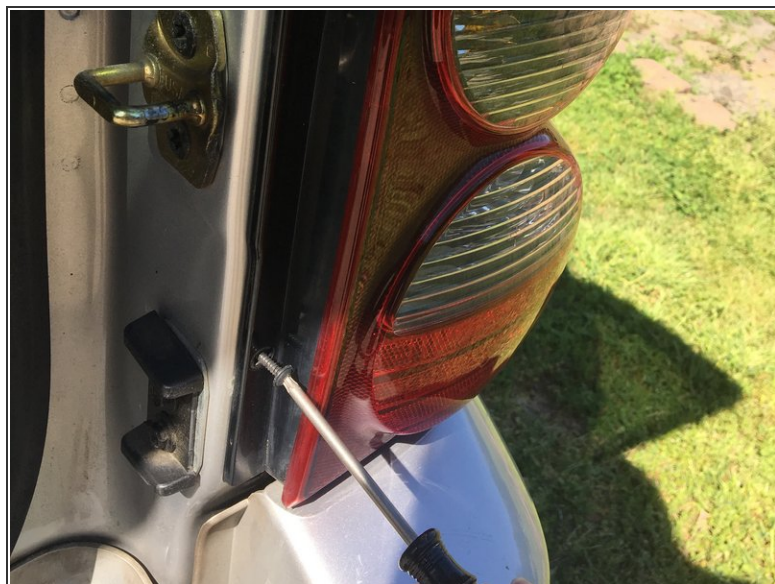

- [SYLVANIA 3157](#) (1)

Step 1 — 2002-2007 Jeep Liberty Rear Indicator Light

- Open the vehicle's rear door to access the tail light assembly.

Step 2

- Use the T-20 Torx screwdriver to unscrew the two screws holding the tail light cover.

Step 3

- Remove cover by pulling out and away from car.
- The cover is fastened with two plastic alignment pins.

Step 4

- Twist the middle socket counter-clockwise.
- Pull the socket out of the tail light assembly to access bulb.

Step 5

- Grasp the lightbulb and pull it out of the socket.

To reassemble your device, follow these instructions in reverse order.
