

# MacBook Pro 13" Unibody Mid 2009 Logic Board Replacement

Written By: Walter Galan

---

# INTRODUCTION

This guide is an internal private guide used as a prereq.

## TOOLS:

- [Tri-point Y0 Screwdriver](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
-

## Step 1 — Logic Board

- Grab the plastic pull tab secured to the display data cable lock, and rotate it toward the DC-in side of the computer.
- Pull the display data cable connector straight away from its socket, towards the DC-in side of the computer.

## Step 2

- Remove the following two screws securing the display data cable bracket to the upper case:
  - One 7 mm Phillips.
  - One 5 mm Phillips.
- Lift the display data cable bracket out of the upper case.

This document was generated on 2020-11-28 01:36:30 AM (MST).

## Step 3

- Use the flat end of a spudger to pry the subwoofer and right speaker connector up off the logic board.

## Step 4

- ⚠ In this step you will disconnect the camera cable. Most machines will have a small self adhesive plastic retainer stuck to the logic board to keep the connector in place. Before disconnecting the cable, be sure this retainer is moved out of the way.
- Pull the camera cable connector toward the optical drive to disconnect it from the logic board.

- i** This socket is metal and easily bent. Be sure to align the connector with its socket on the logic board before mating the two pieces.

## Step 5

- Use the flat end of a spudger to pry the optical drive, hard drive, and trackpad cable connectors up off the logic board.

## Step 6

- Use your fingernail or the tip of a spudger to flip up the cable retaining flap on the ZIF socket for the keyboard ribbon cable.
- Use your spudger to slide the keyboard ribbon cable out of its socket.

## Step 7

- Peel the small strip of black tape off the keyboard backlight ribbon cable socket.

## Step 8

- Use the tip of a spudger to flip up the cable retaining flap on the ZIF socket for the keyboard backlight ribbon cable.
- Use your spudger to slide the keyboard backlight ribbon cable out of its socket.

## Step 9

- Use the flat end of a spudger to pry the battery indicator cable connector up off the logic board.

## Step 10

- Use the tip of a spudger to pry the microphone off the adhesive attaching it to the upper case.

## Step 11

- Remove the following screws:
  - Five 3.1 mm Phillips.
  - Two 3.9 mm Phillips.
  - Two 7 mm Phillips from the DC-in board.

## Step 12

- Remove the following Tri-point screws securing the battery to the upper case:
  - One 5.5 mm Tri-point screw.
  - One 13.5 mm Tri-point screw.
- Lift the battery out of the upper case.

## Step 13

- Lift the logic board from its left edge and raise it until the ports clear the side of the upper case.
- Pull the logic board away from the side of the upper case and remove it, minding the DC-in board that may get caught.

Be careful not to rip out the fragile connector plug of the microphone assembly.

To reassemble your device, follow these instructions in reverse order.
