

# Samsung Galaxy A51 Back Cover Replacement

How to remove the back cover on your Samsung Galaxy A51.

Written By: Adriana Zwink

# INTRODUCTION

Use this guide to remove the back cover on your Samsung Galaxy A51.

You'll need replacement adhesive to reattach the back cover when reassembling the device.

## TOOLS:

- [iOpener](#) (1)
  - [Suction Handle](#) (1)
  - [iFixit Opening Picks set of 6](#) (1)
-

## Step 1 — Back Cover

- ⓘ Before beginning this procedure, completely power off your phone.
- Prepare an [iOpener](#) and apply it to the back cover to soften the adhesive.
- ⓘ The adhesive of the Samsung Galaxy A51 is very strong. You can use a hair dryer or a heat gun if you aren't able to open the device with the iOpener.
- ⚠ Be careful not to overheat the phone—the AMOLED display and internal battery are both susceptible to heat damage.

## Step 2

- Insert the tip of an opening pick between the frame and the back cover at the bottom of the phone near the USB-C port.
- If you can't get between the back cover and midframe with your opening pick, you can use a suction handle or [strong tape](#) to pull up the back cover to create a gap.
- Slide the opening pick to the bottom right corner and leave it there.

### Step 3

- Insert a second opening pick and slide it from the bottom right corner to the bottom left corner to cut the adhesive.
- Leave the opening picks in place to prevent the adhesive from resealing.

### Step 4

- Insert a third opening pick under the bottom left corner of the back cover.
  - ❗ If you have any trouble, apply more heat to further soften the adhesive. Follow the iOpener instructions to avoid overheating.
- Slide the opening pick along the left edge of the phone.
- Leave the opening pick in the top left corner to prevent the adhesive from resealing.

## Step 5

- Insert a fourth opening pick under the top left corner of the back cover near the camera.
- Slide the tip of the opening pick along the top edge of the phone to the right corner to cut the adhesive.
- Leave the opening pick in the top right corner to prevent the adhesive from resealing.

## Step 6

- With opening picks in all four corners, insert a fifth and final opening pick under the top right corner of the back cover.
- Slide the tip of the opening pick along the right edge of the phone to the bottom right corner to cut the remaining adhesive.

## Step 7

- Remove the back cover.
- ★ After installing the back cover, apply strong, steady pressure to your phone for several minutes to help the adhesive form a good bond—a stack of heavy books works well.

Secure the new back cover with pre-cut adhesive or double-sided adhesive tape.

To reassemble your device, follow these instructions in reverse order. Apply new adhesive where necessary after cleaning the relevant areas with isopropyl alcohol (>90%).
