

iMac Intel 21.5" Retina 4K Display 2019 Lower Support Bracket Replacement

Prerequisite for removing the lower support bracket in an iMac 4K 2019.

Written By: Adam O'Camb

INTRODUCTION

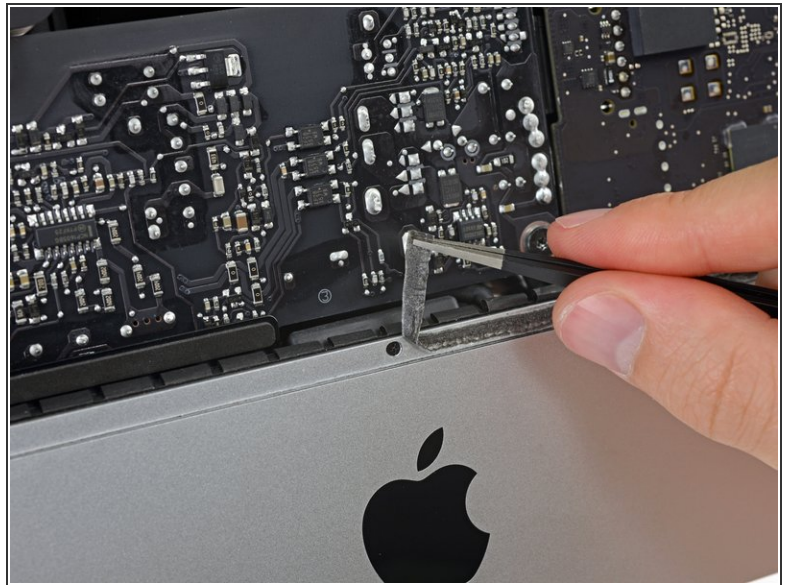

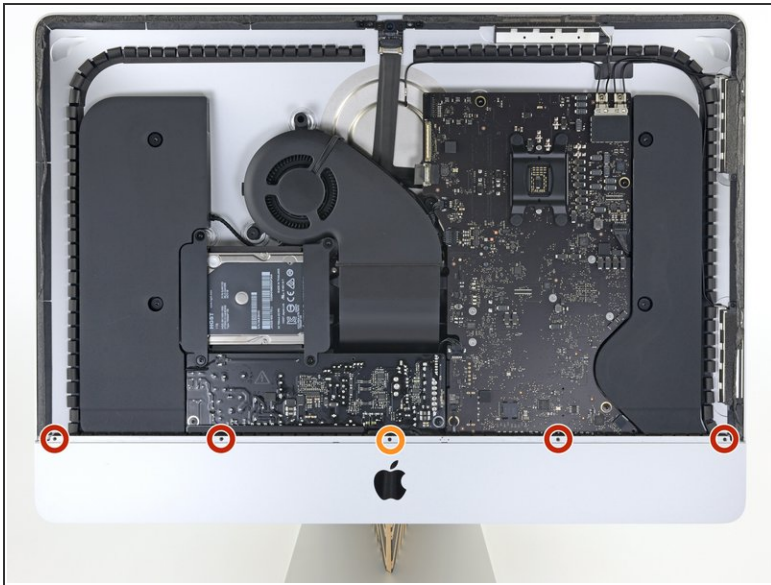

Prereq-only guide for removing the lower support bracket in an iMac 4K 2019.

TOOLS:

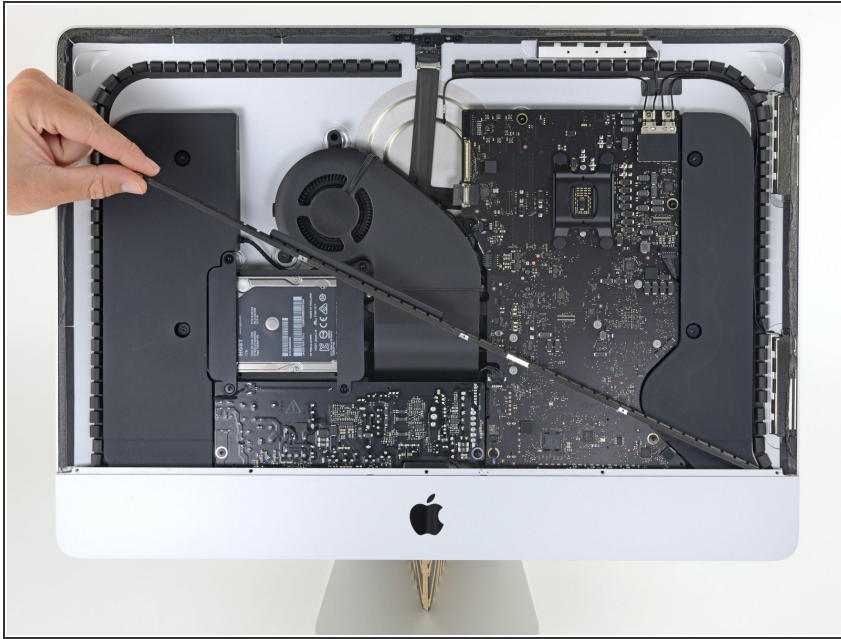

- [Tweezers](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Remove the lower support bracket

- Remove the following five Phillips screws holding the lower support bracket in place:
 - Four 3.2 mm screws
 - One 1.7 mm screw
- ⓘ You may need to peel up the display adhesive lining the bottom edge of the iMac enclosure to access the screws.

Step 2

- Remove the lower support bracket (a.k.a. "chin strap") from the iMac enclosure.

To reassemble your device, follow these instructions in reverse order.
