

Casio FX-991MS Battery Replacement

This guide demonstrates a step-by-step process...

Written By: Anthony

INTRODUCTION

This guide demonstrates a step-by-step process on how to replace a CASIO FX-991MS battery. While the scientific calculator has a solar panel, the battery is still able to die after long usage, therefore it is necessary to understand how to replace it. Here you will learn how to quickly swap out the battery quickly and efficiently.

TOOLS:

[iFixit Opening Tool](#) (1)
[Phillips #0 Screwdriver](#) (1)

PARTS:

[LR44 \(A-76\) Batteries](#) (1)

Step 1 — Battery

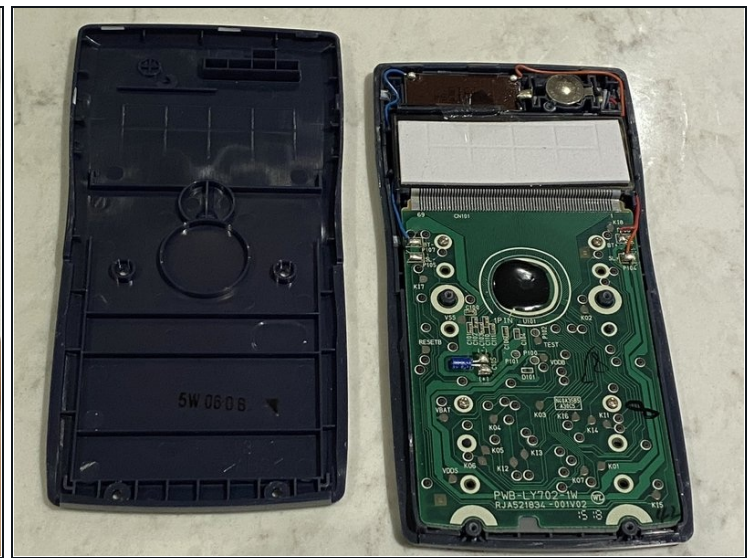

- Remove the case and flip the calculator backwards.

Step 2

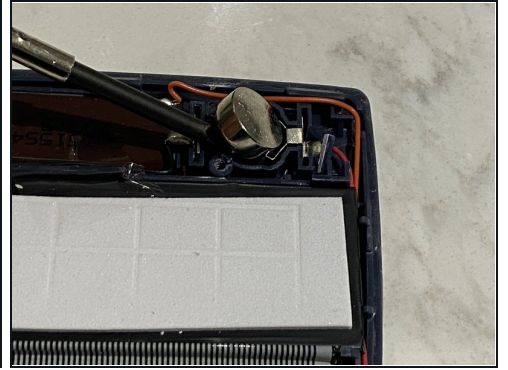

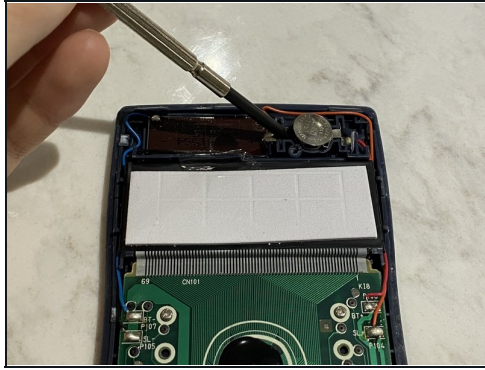

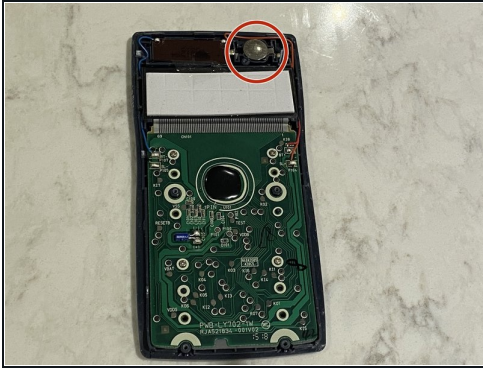

- Use a Philips #0 head screwdriver to remove the five screws on the back of the device.

Step 3

- ⓘ The top half of the calculator is tightly closed.
- Carefully use an opening tool to slowly pry open the sides till it opens.
- ⓘ Apply a little bit of force if this is the first time opening the calculator.

Step 4

- Use an opening tool to gently remove the battery from the device.

To reassemble your device, follow these instructions in reverse order.
