

# TomTom XXL 540 Screen Replacement

Written By: Mike Sollars

---

## **TOOLS:**

T5 Torx Screwdriver (1)  
Tweezers (1)

## **PARTS:**

TomTom XXL Replacement 5" LCD  
Touchscreen & Digitizer (1)

---

### Step 1 — Screen

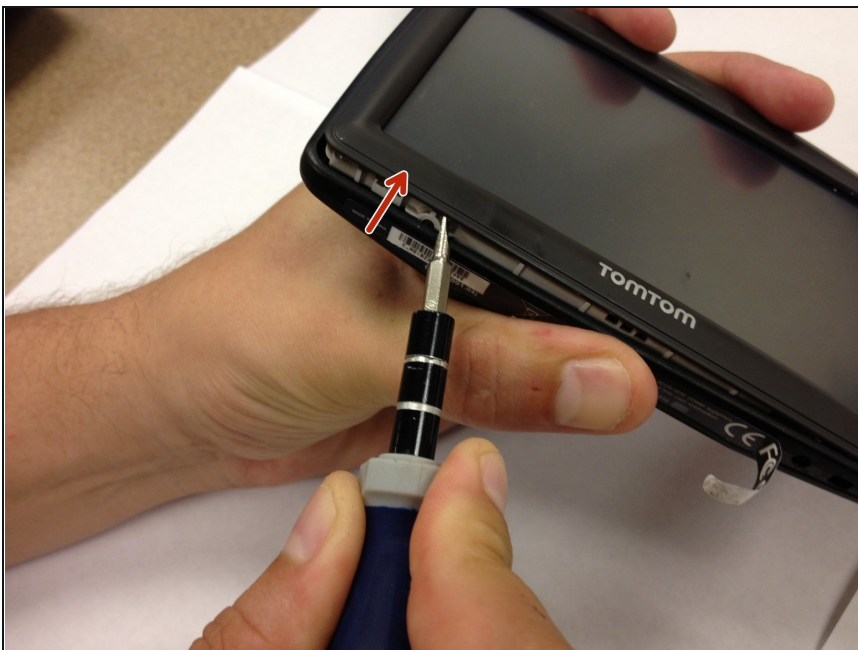

- Peel back the sticker, using the [tweezers](#) on the bottom of the device to reveal the two screws.

## Step 2

- Unscrew the two T5 screws using the T5 Torx Screwdriver.

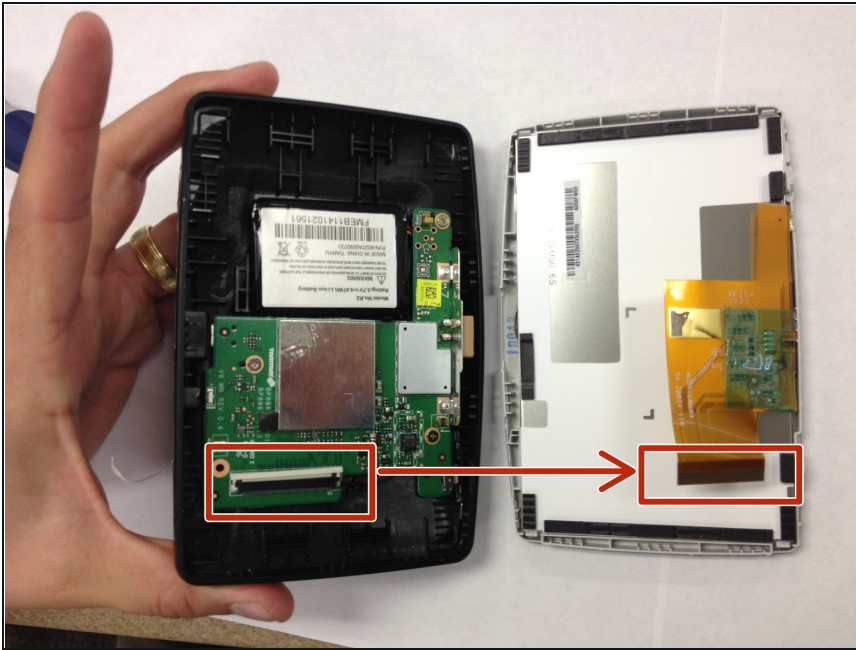

## Step 3

- Insert the flat head screwdriver into the edge of the device. Using it as a lever, carefully pry the face-plate up.

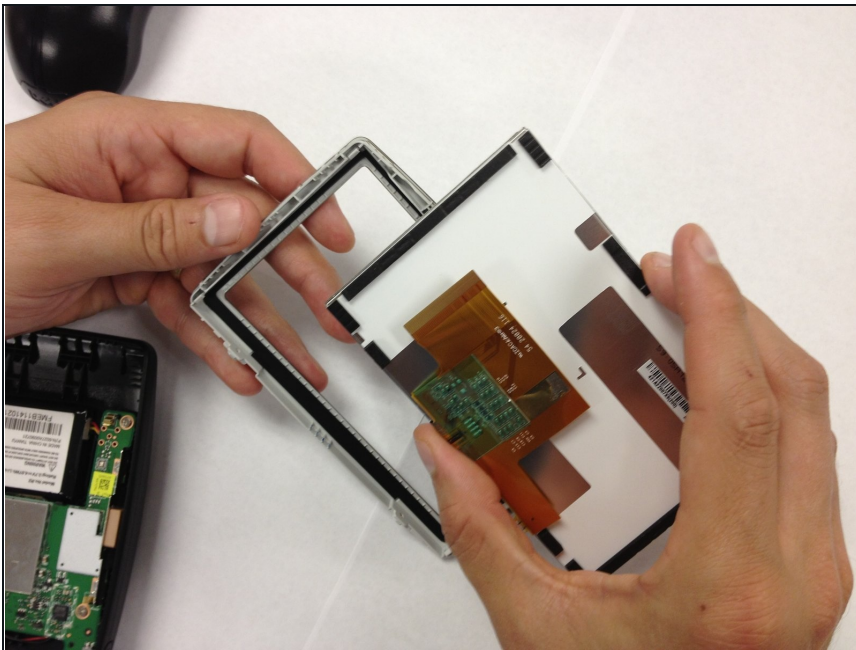

## Step 4

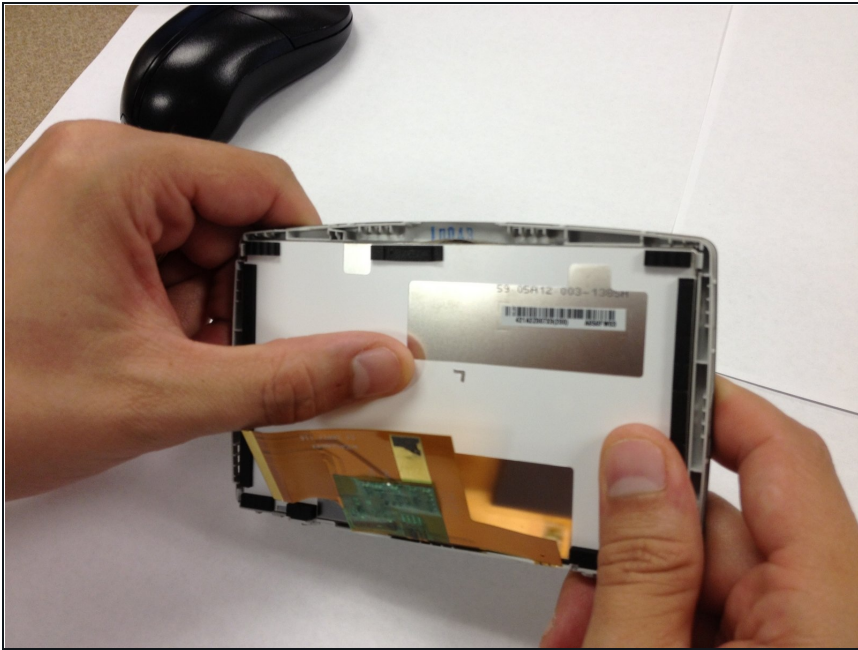

- Carefully grab the ribbon cable with two fingers and pull the yellow ribbon cable upwards away from the motherboard.

## Step 5

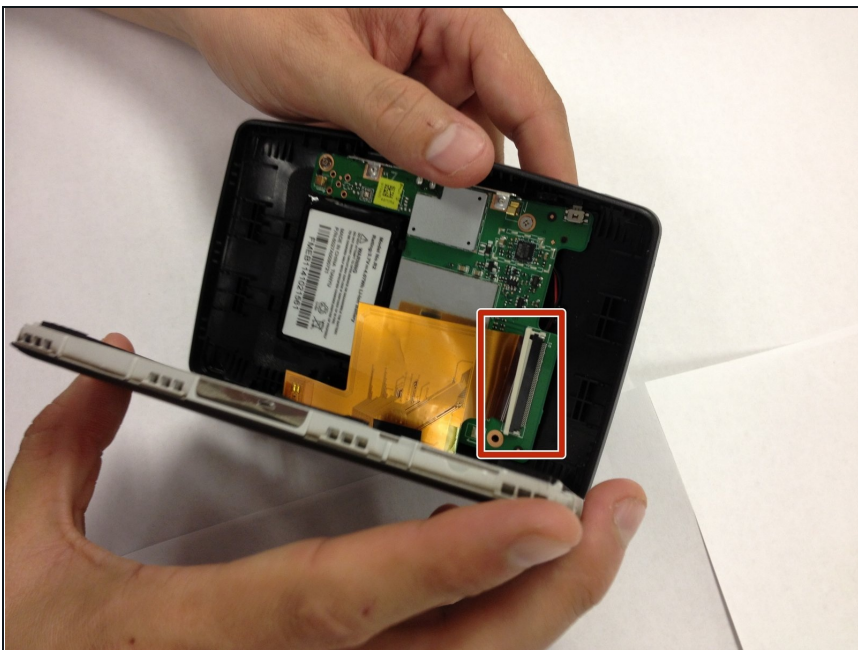

- Remove the screen from of the face-plate.

## Step 6

- Insert the new screen into the face-plate.

## Step 7

- Reattach the yellow ribbon cable to the motherboard.

## Step 8

- Using two hands, hold both ends of the device and snap the two plates together.

## Step 9

- Re-insert the two T5 screws and tighten.

## Step 10

- Re-apply the label edges back down to cover the screws.

---

To reassemble your device, follow these instructions in reverse order.
