

Motorola Razr V3c Speaker (CDMA) Replacement

This guide will show you how to remove and...

Written By: Joshua Ruehlig

INTRODUCTION

This guide will show you how to remove and replace the speaker for a Motorola V3c.

TOOLS:

T5 Torx Screwdriver (1)

T6 Torx Screwdriver (1)

Step 1 — Battery (CDMA)

- Press down on the the rear panel release button while simultaneously prying the rear panel straight away from the V3c.
- Lift and remove the rear panel away from the V3c.

Step 2

- Remove the battery by pushing in the top of the battery and lifting it away from the phone.

Step 3 — Speaker (CDMA)

- Unscrew the two screws in the back using the T6.

Step 4

- Use the plastic opening tool to pop the bottom and the sides off the back casing.

⚠ Be careful not to pull the back lower cover off too far as it is connected to the phone body by a ribbon.

Step 5

- Peel off the connector between the motherboard and the body of the phone.

Step 6

- Pull out the two black rubber covers using [tweezers](#).

ⓘ The second rubber cover is much harder to get out.

Step 7

- Pull out the white plastic cover by unclipping the two plastic pieces shown.

Step 8

- Pull out the speaker.

To reassemble your device, follow these instructions in reverse order.
