# INTRODUCTION

If the front slider on the camera is cracked or broken, use this guide to remove and replace it.

This guide is also a prerequisite for disassembling other parts of the camera in order to prevent damage to the slider, and to make dis-assembly easier.

## TOOLS:

Phillips #00 Screwdriver (1)

---

### Step 1 — Slider

- Locate the 2 screws on the bottom of the slider.
- Remove both screws with a #00 Phillips screwdriver.

## Step 2

- Gently pull on the bottom of the slider until it comes off the lower track.
- There is a little piece that connects the slider to the track. Be sure not to lose this as it is needed to put the slider back on.

## Step 3

- Lift the slider up until it comes off the upper track.

## Step 4

- The slider should now be free from the body of the camera.
