INTRODUCTION

This guide will help you change the battery in your Chromebook. It requires you to take the Chromebook apart, since the battery is located inside.

🔧 **TOOLS:**

- Phillips #00 Screwdriver (1)
- iFixit Opening Tool (1)

⚙ **PARTS:**

- Samsung Chromebook XE303C12 Battery (1)

Step 1 — Bottom Cover

- Lay the Chromebook down so that the bottom cover is facing up.

- Remove the rubber feet on the four corners of the Chromebook in order to get to the screws underneath. They are stuck on with an adhesive.

Step 2

- Remove the nine 4.7 mm screws on the bottom cover using a Phillips #00 screwdriver.

Step 3

- Pry up the plastic strip on the back of the Chromebook using a plastic opening tool.

- (i) It is not necessary to remove it completely. It just needs to be separated from the bottom cover.
Step 4

- Pry off the bottom cover using a plastic opening tool.
|

Step 5 — Battery

- Remove six 3.5 mm screws holding the battery using a Phillips #00 screwdriver.

- Pull out the battery partway in order to easily get to the battery connector.

Step 6

- Disconnect the battery connector by pulling straight up at its base.

- ⭐ When reassembling, simply position the connector above it's original place, and push down.

Step 7

- You can now remove the battery.

To reassemble your device, follow these instructions in reverse order.
