Step 3 — Faceplate

- Insert the plastic opening tool under the faceplate.

- Separate the faceplate from main body by twisting the prying tool with some force.

- The faceplate is held by three plastic fasteners, so pry evenly on both sides of phone.
Step 4 — Keypad

- With the faceplate removed, simply peel off rubber key pad and remove.
Step 5 — Motherboard Assembly

- Locate and remove the six screws on the front of the phone using a T6 Torx.
  - All 6 screws are 6.9mm long.

Step 6

- After removing screws, lift the motherboard assembly straight off the cell phone body.

Step 7 — Power Button

- With the motherboard and LCD unit removed, gently pull the power button out of its housing.

To reassemble your device, follow these instructions in reverse order.
