

Starbucks Barista Steam Wand replacement or cleaning

A repair guide for the steam wand that shows how to remove the wand and unclog and de-calcify it if flow is obstructed.

Written By: David

INTRODUCTION

The steam wand is used to steam and froth milk as well as dispense hot water for Americanos or tea.

TOOLS:

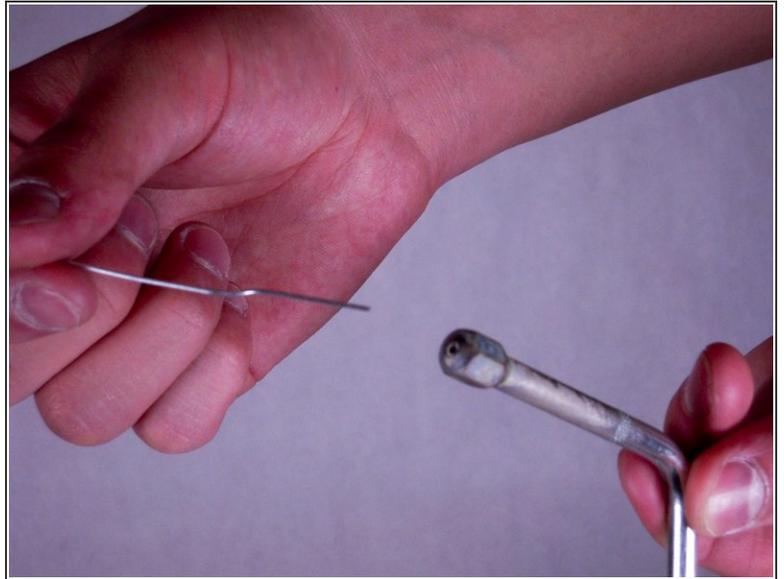

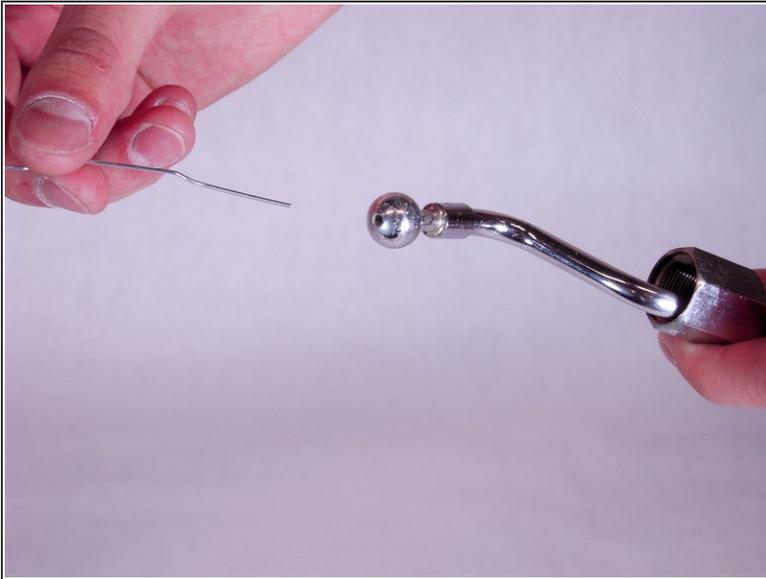

- [Paper Clip](#) (1)
-

Step 1 — steam wand

- Using a wrench, unscrew the hex nut and remove the steam wand.
- Note: Do not lose the hex nut once it is unscrewed.

Step 2

- Using a thin tool or item, such as a paper clip, poke around through the holes on both ends of the wand to remove any foreign material.
- Place the steam wand in a de-calcifying solution as directed by product.
- Reconnect the steam wand.
- See the links section of the device page to purchase a new steam wand.

To reassemble your device, follow these instructions in reverse order.
