## Step 1 — Method 1: View Through 'Go' Menu

- In the first method, we'll be using a hidden option in the Finder's 'Go' menu.
- To start, open a new Finder window click the 'Go' menu.
- While holding the option key, click the option 'Library'.
- ⓘ While the library folder is not present in this screenshot, it will appear above the 'Computer' item.

To reassemble your device, follow these instructions in reverse order.
