Step 1 — Battery

- Use the plastic opening tool to pry off the back cover.

Step 2

- Lift the battery out of place.

- When replacing the battery, the (+) and (-) symbols must match up with the phone's charging nodes.

Step 4

- Use a plastic opening tool to loosen the tabs around the edge of the phone.

- Inserting a thin piece of plastic will help prevent opened tabs from locking back into place.

- ⚠ This step can be frustrating, but requires patience. Avoid the temptation to pry the panel loose. Using excessive force may break the delicate tabs.

Step 5 — Front Facing Camera

- Use the plastic opening tool to carefully pry the front-facing camera from the motherboard.

To reassemble your device, follow these instructions in reverse order.
