### TOOLS:

- [iFixit Opening Tools](#) (1)
  - [T5 Torx Screwdriver](#) (1)
  - [Tweezers](#) (1)
  - [Soldering Iron](#) (1)
-

## Step 1 — Front Frame Panel

- ❗ Power off your GPS before moving on.
- Locate the crevice that separates the frame from the body.

## Step 2

- Carefully insert the plastic prying tool into the crevice to separate the frame from the body.
- ⚠ Applying excessive force can lead to a damaged or scratched display screen.

### Step 3

- Slide the plastic prying tool around the perimeter to completely remove the frame.

### Step 4 — Second Frame Panel

- Remove the four 11.0 mm screws using the Torx T5 screwdriver.

## Step 5

- Using the plastic prying tool, dislodge the frame from the body of the device.
- Using your hands, completely disconnect the frame from the body.
- Set the pieces of the frame aside.

## Step 6 — Display Screen

- Gently lift up the display screen using your fingers to make sure the only thing connecting it to the body is the ribbon cable.

## Step 7

- Remove the piece of tape that is covering the connecting point of the motherboard and display.

## Step 8

- Using the plastic opening tool or your fingers, lift up the ZIF connector holding the ribbon cable in place.
- Carefully pull the ribbon cable out of the connector with tweezers or two fingers.
- Gently disconnect the display by pulling upward. Set display aside.

⚠ If the display screen does not disconnect easily, make sure the ZIF connector is no longer holding it in place.

## Step 9 — USB Port

- Use your T5 Torx screwdriver and unscrew the two 5.0 mm screws on the motherboard.

## Step 10

- Flip the motherboard over towards the battery.
- Use your tweezers and disconnect the two wire connectors from the motherboard.
- Pull the motherboard out and locate the USB port.

## Step 11

 If this is your first time solder here is a link on how to solder. [How To Solder and Desolder Connections](#)

- Gently and delicately heat up the solder holding the USB port to the circuit board.
- Carefully remove the USB port with your metal tweezers and set it aside

To reassemble your device, follow these instructions in reverse order.
