

Acer AL1916 Power Supply Board Replacement

This guide will show the steps required to remove the back cover of the monitor, take out the malfunctioning power supply board, and install a new power supply board.

Written By: Keith

INTRODUCTION

Replacing a bad power supply board will ensure that your monitor gets power.

TOOLS:	DARTS:
 Large Needle Nose Pliers (1) 	 Acer AL1916 Power Supply (1)
 Phillips #2 Screwdriver (1) 	
 iFixit Opening Tools (1) 	

Step 1 — Stand

(i) Lay the monitor on a flat surface so that the back is facing up.

Step 2

- Grab the hinge cover with both hands on either side of the stand.
- Squeeze inwards with your thumbs and fingers and lift up to remove the hinge cover.

• Remove the four 12.1 mm Phillips #2 screws that hold the stand to the monitor.

A Support the monitor while removing the screws to prevent the monitor from falling.

• Lift up to detach the stand.

Step 4 — Outer Case

• Remove the five 9.5 mm Phillips #2 screws located around the perimeter of the monitor.

- Starting at the corner of the monitor, wedge the small plastic opening tool between the back cover and the display bezel.
- Tilt the plastic opening tool up to separate the back cover from the display bezel.
- Continue around the perimeter of the monitor until the display bezel comes off.
- (i) A reasonable amount of force is necessary to detach the back cover from the display bezel.

- (i) Reposition the monitor so that the back is facing up.
- Grab the corners of the monitor and jiggle them upwards to detach the back cover from the inside of the monitor.
- Lift the back cover up.

Step 7 — EMI Shield

Remove the two 5.7 mm Phillips #2 screws located on either side of the EMI shield.

Step 8

 Using a nut driver (or if necessary, needle-nose pliers), remove the two nuts on either side of the VGA input.

- Grab the metal casing by the sides and slide it down towards the bottom of the monitor.
- Lift up to remove the metal casing.

A Beware, metal casing is sharp!

Step 10 — Power Supply Board

 Remove the three 7.5 mm Phillips #2 screws and one silver 8.3 mm Phillips #2 screw from the power supply.

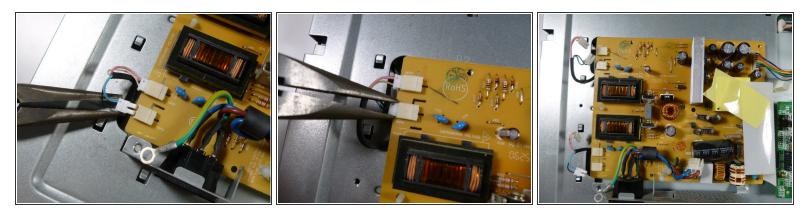

Remove the two pieces of yellow tape on the left side of the power supply.

Step 12

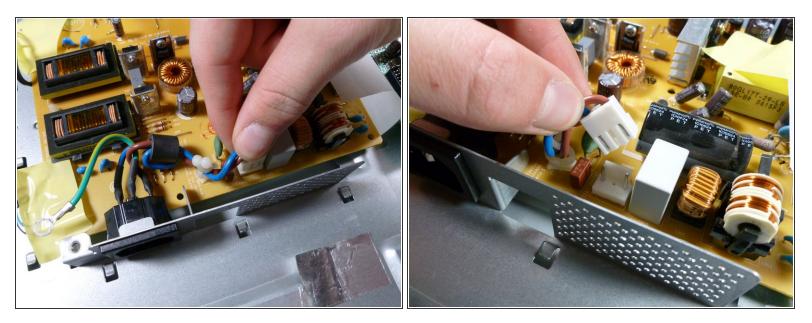

• Remove the four little white clips located underneath the tape by lifting up on their left side.

(i) It would be a good idea to take a picture of the way these connect before removing them.

• With the needle-nose pliers, remove the four display connectors by pulling them away from the power supply.

Step 14

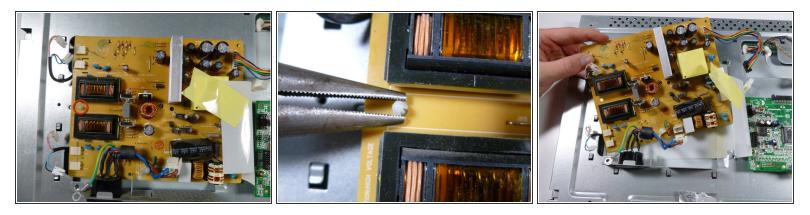

• Pull up and remove the white plug that connects the blue and brown wires to the power supply.

Remove the rainbow-colored power cable by pulling it straight up.

Step 16

- Using the needle nose pliers, pinch the white clip so that it can fit through the hole in the power supply.
- Lift up the power supply and remove it from the rest of the monitor.

To reassemble your device, follow these instructions in reverse order.
