

Samsung Galaxy Tab A 7.0 Battery Replacement

Replace faulty battery to your Samsung Galaxy Tab A 7.0"

Written By: Bradley Watson

INTRODUCTION

During all steps, handle every component with care as they are very delicate electronic parts.

TOOLS:

- [iFixit Opening Tools](#) (1)
- [Tweezers](#) (1)

PARTS:

- [Galaxy Tab A 7.0 Battery](#) (1)
-

Step 1 — Battery

- Using the plastic opening tool, starting at any corner on the tablet, insert the tool between the back panel and the front panel.
- Slide tool around the tablet to unlock the panels from one another.

Step 2

- Carefully remove the back panel from the front panel.
- The inner components of the tablet will now be exposed.

Step 3

- Using tweezers, gently lift the black tab locking the wire connecting the battery to the motherboard.
 - Pull wire from connector.
- i** This is the only connection for the battery to the motherboard.

Step 4

- Remove the battery from the device.
- i** Separating tool may be needed in order to lift battery from device.

To reassemble your device, follow these instructions in reverse order.
