

Aiptek DZO-V58N Lens Replacement

The lens focusses the light to create an image...

Written By: Zachary Yun

INTRODUCTION

The lens focusses the light to create an image on the surface of the image sensor. Use this guide to replace the lens.

TOOLS:

[Tweezers](#) (1)

[Phillips #00 Screwdriver](#) (1)

[iFixit Opening Tool](#) (1)

Step 1 — Battery

- Locate the battery compartment on the back of the camera. It is the panel with the plastic ridges for simple removal.
- Slide the battery compartment cover down off of the camera body.

Step 2

- Pry up the battery from the bottom using a finger and remove the battery from the case.

Step 3 — Lens Protector

- Remove the lanyard by pulling the grey lace through the black string loop.
- Pull black string loop through the silver bracket.

Step 4

- Use a plastic opening tool to pry off the black control cover.
- ① The face plates are glued, so use force to pry the face plates from the camera body.

Step 5

- Use a plastic opening tool to pry off the ridged back face plate and the black button.
- ① The face plates are glued, so use force to pry the face plates from the camera body.
- ① The button is loose and should come off with little or no effort.

Step 6

- Use a plastic opening tool to pry off the silver face plate.
- ① The face plates are glued, so use force to pry the face plates from the camera body.

Step 7

- Open the USB cover to expose the small machine screw.
- Use the Phillips #00 screwdriver to unscrew the six 0.5cm machine case screws (distributed around the camera body).
- ① These small screws are easy to lose. Place the removed screws in an organized container to avoid losing them.

Step 8

- Pull off the side control panel.

Step 9

- Flip open the screen by pulling the loose end of the screen away from the case.
- Use [tweezers](#) to remove the two outside rubber dots to reveal the two 0.5cm machine screws.
- Use the #00 Phillips Screwdriver to remove both screws.

Step 10

- Pull the body apart from the bottom of device just enough to make space to remove the silver plastic strap holder.
- Use tweezers to remove the silver plastic strap holder.
- Use a plastic opening tool to pry off the lens protector.

Step 11 — Lens

- Unscrew the two silver 0.5cm machine screws with the #00 Phillips screwdriver.
- Lift off the lens protector housing.
- Pull apart the two halves of the camera body.

⚠ Do not pull the two halves apart too far because the wires may detach.

Step 12

- Unscrew both black machine screws holding the lens in place with the #00 Phillips screwdriver.

Step 13

- Carefully remove the compressed springs underneath each of the two screws that were removed in the previous step.
- ① Be careful not to lose the springs. The springs are in compression and will launch from the camera if not held onto.

Step 14

- Lift off the lens.

To reassemble your device, follow these instructions in reverse order.
