INTRODUCTION

You will need a screwdriver with a PH000 head, and a prying tool.

🔧 TOOLS:

- Prying and Opening Tool Assortment (1)
- 64 Bit Driver Kit (1)
- Metal Spudger (1)

Step 1 — Battery

- Remove the back cover by prying it open with the metal spudger tool.

Step 2

- Remove the two screws with a PH000 head screwdriver.

- Keep all your screws in one place.

Step 3

- Remove the metal piece.

- 📌 Keep this piece safe, as you will need it to reassemble the device again.

Step 4

- Remove the battery by lifting it up using a plastic spudger.

Step 5

- Disconnect the cable from the connection.

- ⚠ Be careful not to tear or bend the cable.

To reassemble your device, follow these instructions in reverse order.
